

The first image shows all the consecutive layer numbers, and each layer is shown in its own color. Another image with the inscription " Cut "shows the contour of the first layer, and this contour needs to be "CUT", and the third image with the inscription " Engrav "shows the drawings of the first layer, and they need to be" DRAWN WITH a MARKER "or"ENGRAVED WITH a LASER". All this should be repeated with each layer.

The archive "Owl multilayer with key_red black" contains the same layers, but the vectors that need to be cut are shown in red, and the vectors that need to be engraved (or drawn with a marker) are black.

For convenience, in the "Owl multilayer with key_separate layers" archive, each layer is in its own file, and besides, the vectors for cutting are shown in red, and the vectors that need to be engraved are shown in black.

Finished product size – 13,0 * 8,5 inches
