About This Project

With another baby boy arriving in August, my one and three year olds are moving to a "big boy" room. My oldest decided he wanted a bunk bed and as they both are obsessed with tractors, when I saw the "John Deere Tractor Bunk Bed" plan, I was sold.

We would be needing a twin sized bunk bed though not a toddler. I used the classic bunk bed plans and simply modified them to suit our needs. I moved the ladder to the front, added a rail on the bottom bunk and added a small ladder to the side for my one year old to climb into the bottom bunk.

Once the the frame of the bed was complete, I added the tractor accessories. A couple of storage cubby shelves with fabric baskets for toy tractors which act as stairs up to the ladder and make the tractor bucket at the front. Also, the wheels which are made from joined 1x6s as I find plywood hard to sand and paint to the quality of finish I like. A cab & roof from 1x4s framed together. A side mirror that I decoupage a picture of another tractor on. I used push lights for the headlights as well as a reading light above each bed (they're on timers so they'll turn themselves off). A steering wheel (play equipment access from toys r us). Also, I built and mounted by the head of both beds a "flat wall book holder" so they would have somewhere to store a few books.

My boys and I are fairly new to building so I spent a lot of time planning and measuring to ensure it would all come together in the end. It paid off because it all went smoothly (even with "help" from my boys). It's not perfect but they're very happy with the result. We also built a John Deere themed "Just my size closet" and even finished with over a month to spare before the new baby arrives! :)

Just want to say a quick thank you to Ana both for the amazing plans and also the inspiration to take on these projects. The time spent with my boys building as well as the resulting treasures are priceless and I would have never realized what we were capable of had I not stumbled upon your website and been so inspired by you and everything you've accomplished. Thank you!

Built from Plan(s): [Classic Bunk Beds](#) [8]

[John Deere Tractor Toddler Bunk Beds](#) [9]

Estimated Cost: \$550.00

Estimated Time Investment: Week Long Project (20 Hours or More)

Type of Wood: Pine

Finish Used: John Deere Green paint (home depot was able to color match a toy tractor), marigold yellow and black and polyurethane.

Required Skill Level: Beginner
